AutoCAD is an Autodesk product, but other Autodesk products, such as Map 3D, Revit, Inventor, and Fusion 360, may be used with AutoCAD. Contents Visual appearance As with many computer applications, AutoCAD first appeared in the mid-1980s as a DOS-based application and has since evolved to the point that, as of 2018, it is available on macOS, Windows, and Linux operating systems. It does not have a "look" of its own but displays the visual elements in accordance with the operating system of which it is a part. The user interface of AutoCAD consists of two main panels (see image on the left): The drawing area (drewing). In the case of AutoCAD, the drawing area is the space on the canvas within which the user builds and manipulates two-dimensional drawing objects. The toolbars. These include buttons that are available for selecting and manipulating the objects in the drawing area. Other areas The drawing area is divided into two main areas (see image on the right): The viewport. A viewport is a window into which two-dimensional drawing objects are placed. As the name implies, a viewport is a window into the space in which the drawing object is placed and from which the drawing object is visible. There are four main types of viewports: AutoCAD's default viewport. This viewport is a 2D view of the drawing area (as it appears in AutoCAD), with most of the toolbars being rendered in the background. The user can move from one viewport to another by using the arrow keys and moving the mouse. Viewport selection. By default, the viewports are displayed in the order in which they were created (as shown in the rightmost panel of the image below).

Users can switch between viewports and move from one viewport to another by holding the Shift key and pressing the Arrow keys. Orthographic view. By default, each viewport displays the drawing objects in the viewport as if viewed at a distance of 1000 mm. (See the image below for an example.) The user can move from one viewport to another by pressing the Spacebar or using the Arrow keys. Fixed or layout view. By default, each viewport displays the drawing objects as if viewed at a distance of 0 mm. The user
