What's New In?

SqrSoft Advanced Crossfading Disk Writer is a Winamp output plugin that will allow you to mix audio files by applying a "crossfade", sending the mixed sound to one or more WAV files. The crossfade is made by an engine that supports non-linear crossfades and automatic detection of the mixing point, also allows the generation of multiple WAV files, maintaining continuity of sound, ideal to be burned into an Audio CD or uploaded to your portable audio player! Output PCM Formats Standard WAV files (RIFF). 11025Hz, 22050Hz, 44100Hz and 48000HZ. Mono and Stereo. 8-bits and 16-bits. Input PCM formats Any sample rate (built-in samplerate converter). Mono and Stereo. 8-bits and 16-bits. Mixing buffer 500ms to 16s configurable range. Crossfade Adjustable working range, 0% to 100% of the mixing buffer, initial(fade-in) and final(fade-out) level control. Crossfade curve control (non-linear). Signal analyzer It allows crossfade point shifting by signal level. Trigger level from -1dB to -60dB. Gap Killer Adjustable trigger level from -6dB to -60dB. Individual settings for rise and fall edges of the track. Smooth cut to prevent clicks on some tracks with high DC bias offset. Advanced options It allows to enable or disable: Fade on stop, crossfade small tracks, truncate long tracks and the whole Crossfader Engine.
