Easy Network Manager is a software application designed to help users configure their network in just a few steps. It sports a clean and straightforward interface that gives users the possibility to select from various preset icons (e.g. house, library, office, meeting, school, academy, institute), and specify the location name. What's more, Easy Network Manager lets you select the Internet connection type (direct connection, sharing server, or sharing client) and device. You can make the

---

program automatically generate the IP address or manually specify it, as well as set up the default printer parameters. Basically, it proves to be extremely easy to work with this tool, as you are offered step-by-step guidance throughout the entire process. At the end of the task, the application saves the IP address of the specified location and the information provided by the default printer by assigning a name and an icon to your network area. Additionally, the new location can be modified or removed. Another important feature worth mentioning is represented by the

---

possibility to perform network diagnosis tests in order to check your Internet connectivity. During our testing we have noticed that Easy Network Manager carries out a task very quickly, and no errors showed up throughout the entire process. It manages to remain light on the system resources, so it doesn't burden the overall performance of the computer, nor interfere with other programs' functionality. To sum things up, Easy Network Manager offers an intuitive layout and useful parameters for setting up network configuration with minimum effort, and is suitable for

---

beginners and professionals alike.  
System requirements: Windows  
98/XP/Vista/Win7 System type:  
Portable/Mac Hard drive: 256 MB  
minimum Download Easy Network  
Manager 2.10 free Download.zip file  
below to get the latest version of Easy  
Network Manager Start the file  
installation: Right click on the  
downloaded file and select "Run as  
Administrator" to install the file Click  
on "Install" to start the installation. A  
pop-up message will be displayed  
informing you that you have to restart  
your computer. Click on "OK" to  
restart the computer After the file has

---

been installed, you may now be able to access the "Advanced" tab of Easy Network Manager's main menu Click on "Create new area" and then select the location you wish to create a new network area. The first time you create a network area you will need to enter the IP address manually
