September 17, 2013 I've always said that the best part of being a photographer is the incredible detail that you capture in your pictures. My daughter and I have a mad love for Jaws: The Revenge, but to me, the best part of Jaws: The Revenge is the fact that you can see the pores on my daughter's face at the end of the day. I can say that I'm pretty sure that we're not the only ones with that love, because Jaws: The Revenge was a huge hit last weekend, with a sequel already in the works. Speaking of sequels, I'd like to introduce you to another set of movie sequels that I'm very excited for: Some of these, like Man of Steel and the upcoming Jurassic Park 4, are a bit obvious, but I didn't know that there was a sequel to Rocky in the works until I saw this movie. I don't think I've seen a 70's style movie since... The Godfather Part 2, I guess. Of course, this slideshow is just full of Rocky references. Here are some others that you might not be aware of: I'd say that these movie sequels are just as good as the movies they're based on, except for Rocky IV. I'll leave you with a couple of shots from the last 12 months. My daughter is always good for a good laugh, even if I find her a little confusing at times.

September 9, 2013 Hello friends! As you might have noticed, I haven't been terribly active here on the blog. This is mainly because I've been focusing on my teaching duties for my graduate program. My courses are not very technical, so I don't feel like my photography is getting much better. I also don't want to put out a contentless blog. I'm still in the middle of preparing for my final course in graduate school, so I'm afraid that a lot of the photography I do will be filled with spelling and reading errors. If any c9d1549cdd

You'll have to survive the dangers of the Wurroom by helping the beautiful Natalia Valois' allies in this new Metroidvania-style adventure. Your choice of character will change the way you traverse the Wurroom. Each character has her own mechanical variations, from the way she fights and attacks to her stealth abilities and movement capabilities. With the additions of the new "Cyberwur" mechanic, you'll have to fight enemies with synergy-like effects and combat abilities. Weapon and armor upgrades work as they did in Metroidvania games but also include new tech based on the Wurroom's shadowy and hostile environment. You'll have to choose carefully your actions in the most hostile environment ever created. Fight to the limits of your powers, be patient and helpful to others, make tough choices, and get to know the rhythm of the Wurroom. How can I? For starters, just try it on a save file! Want to be sure? Just try the game on a clean save and you'll see the difference. I'm a fan of Metroidvania games, and for me, Wurmenai combines all the challenges I enjoy and try to find in games with a vast number of hours to enjoy them. Serge Bulat said he enjoyed making Wurmenai while working at the same time on Doctor. Pashtuns hit the streets nationwide on Monday to show their support for Pakistani government on the sidelines of a meeting of the National Consultative Committee (NCC), a forum established under the 1973 Constitution. The participants of the meeting demanded the abolition of Frontier Crimes Regulations (FCR). They demanded the end of drone attacks across the border. They demanded measures to ensure the safety of their brothers and sisters within Pakistan. Unlike other participants, Dr Rasheed Faqir, a leader of the Pashtuns, demanded the establishment of an Islamic state across the Pak-Afghan border. "We should not be called Pashtuns anymore, but they [Pashtuns] should be called Shia Pashtuns, Khilafat Pashtuns," Dr Faqir said. He said Pashtuns should be given the right to establish an independent state in the tribal belt. He said they would fight against any foreign power if they sought to suppress the Pashtun people. The participants of the meeting also demanded that the Pakistani state must implement all existing agreements between the United States and Pakistan on the withdrawal

What's new in Alien Hallway 2:

pathway @ Problem: Symptoms: while working on an assignment in Joomla my site content has begun to be severely distorted. I am able to see pictures and it moves the Joomla content around when I roll the mouse over the images. I have checked the photos and they look fine. I have reported this to the Joomla Support, Symptom solved. **Comments: 1.** I can take the sessions off and that takes the pictures off too. But I don't want to be on the site to this extent.
Q: Using Alternate data streams to refer to a compressed file I have a compressed file I created in the following way. `def make_compressed_file enc = Zlib::Deflate.new(Zlib::COMPRESSION_DEFLATE) filename = create_temp_file filename.write get_contents_as_string, enc filename end` I'm trying to get the original filename the file was created with rather than the compressed one but can't figure out how. Is there a way to do this in rails?
A: Thank you to everyone who took a look at this. The workaround that I have used to resolve this is to change the filename to that of the zip. I've added a proc to the `content_file_name` method and just added the encoding and call it as the original file's name e.g. `content_file_name do |content_file_name| filename = File.basename(content_file_name.original_filename) if content_file_name.is_a?(::String) && content_file_name =~ /\.gz$/ filename`
