## Duane Shinn Instant Chord Finder ##VERIFIED##

Instant Chord Finder Duane Shinn Ititt Chen Copyright 2006 Duane Shinn Instant Chord Finder Instant Chord Finder Chapter 2 There are many good chord finders and chord mapper programs on the internet. Dr. Dheeraj Mehrotra www.duane-shinn.com You must have realized by now that All mapp, is a general chord mapper and not just a chord finder. mapper. Guitar player Joel Primack wrote a tutorial on chord mappings at www.guitar.com/articles/chord-mappings. html In my opinion you should not use chord finder programs or easy chord mappers to learn chord mappings. Chord FINDERS and CHORD MAPPER There are some very good, easy chord finders and chord mappers available on the internet. A good chord mapper will 1) provide chord mappings; 2) show not only the chords, but the chord progressions or chord sequences; 3) show all chords with all applicable fingerings; 4) show where the chord voicing changes or progresses from one chord to another; 5) show all the chords in a song as a chord map; and more. But it would be a shame to spend tens of dollars and hours learning how to use a chord mapper and then not knowing how to apply your new knowledge! In this tutorial I will show you how to create your own very simple chord mapper and chord finder programs. What tools will you need 1) Delphi. 2) Windows. 3) A text editor. 4) Hex editors (There are many Hex editors at your local Computer store. One of the best ones is called Hex. It is free and can be downloaded from the web.) 5) Music notation in a text editor program is a big advantage. Not every chord mapper can support music notation. It is very difficult to describe chord mappings in charts, pictures or any way! You should be familiar with all of these before you start this tutorial. Step 1: Download a free chord mapper There are many chord mapper software programs on the internet. You should use one that is free, because some of them are very complicated. You should use one that is Windows compatible. My favorite one is called ChordMapper and is available at www.duane-

## Duane Shinn Instant Chord Finder

Meet Duane Shinn, the one and only developer of the unique instant chord finder for iOS. Duane is a very special person who not only is he amazing at making cool stuff but he is also a very talented musician who puts a lot of work into a lot of his projects. I hope you will meet Duane in the course of this article. Duane is also a very helpful person and so he has made a short video to show you how it works. His video is attached below this article. Let's find out how Duane's Instant Chord Finder works. Contents: -1. Introduction -2. Installing the app -3. What the app does -4. Walkthrough. Note that there are only 6 steps in this walkthrough. -5. Troubleshooting. 1. Introduction 1 2. Installing the app2 3. What the app does3 4. Walkthrough. Note that there are only 6 steps in this walkthrough. 4.1. Create an account 5 4.2. Connect to your iTunes account 5.5. If you have trouble connecting, click here 6. Troubleshooting6 5.1. Go to iTunes store to buy the song 7 5.2. Go to the new Tab and find.instant chord finder 7.4. Press 'create account' 8 5.3. Underneath text there is an example, you should fill in this example 9 5.4. Click on example and you will be taken to the next step. 5.5. Fill in.example 10 5.6. Fill in.example 11 5.7. Press create account 12 6. Troubleshooting 6.1. If you can't log in 13 6.2. If your examples don't work, try making examples with everything in capitals. 14 6.3. If you are having problems, check out 6.4. If your.instant chord finder isn't working in Chrome, Press the key on your keyboard. 7. What the app does 8. Walkthrough. Note that there are only 6 steps in d0c515b9f4

About the author Dr. Dheeraj Mehrotra, Ph.D 12, 7, 231/2-259/5 Cir. Rd, #632 Los Angeles, California 90065 USA email : Dheeraj@mehrotra.com Ph.D Neuropsychologist (Clinical) Specialties : attention deficit disorder, ADHD, learning, attention working memory, executive function, cognitive and academic achievement, learning disability, reading Duane Shinn Who's the man behind the "instant chord finder"? Duane Shinn is an adult music and happiness specialist. The goal of his work is not so much to teach electronic keyboard playing or catering to the extreme audience-appeal of the "Pop, Rock, Funk, Country, Jazz, R&B" mass audiences but to assist the individual and family member in reaching their highest potential on every level of proficiency, from learning and understanding the basics to developing their skills and "Being Happy". What can I do with this product? This "instant chord finder" is a great tool for anyone using the standard 5.5 x 8.5 sheet of music notation. It is a valuable tool for study, focus, and organization. I use it for basics, scales, chords, arpeggios, jams, and improvisation. It can be used for work, school, or for leisure activities or learning. It works in both real and imaginary time. How is it different from other products? The following is from Duane's web site: I have combined the best parts of the most popular chord identification programs with my own lessons and exercises to make a program that is unique in the world of chord identification, chord preparation, playing and writing chords. I designed this program to be a tool, not a score. The lessons are short, easy to learn, practice able, and usually take only a few minutes to master. This is a computerized system designed to help you learn the notes of the chord by using direct visualization and providing the visual representation of the chord and its notes. It is as easy to grasp as an

c ITIT I | 1.7/22/00 | Many ways to play guitar in this world, but when it comes to music theory it is rare to find an easy to understand and accessible system. Most guitarists are not educated on theory to begin with, so when they begin looking for a solution it becomes an exercise in learning what they should have learned in high school or college! Chords have their own unique sound, and as guitar players we are exposed to so many chords, a particular one, for example, can often be associated with an instrument. It is important to understand how these chords fit into the harmony. Ultimately, the chord (or chords) will dictate the melodies found within the music. If you are a blues guitarist chances are you are not familiar with the major 7th chord known as the 'Major 7'. This is a great progression, but its sound is not particularly appealing to most guitarists. Similarly, the progression known as the 'Minor 3' is also not a popular chord progression with guitarists. This chord progression is great for jazz guitar players but it may not always be well received outside of jazz. Chords are associated with certain instruments. What this means is that different chords are used on a specific instrument. A guitarists sound will always be influenced by the sound of his or her instrument. You will have certain common chords that will pop up over and over in your playing. The chord progression for drumming is very different from the chord progression used by a guitar player. Similarly, the chord progression used for a bass guitar is very different from the chord progression for a guitar. As a guitarist, you should have a good knowledge of chords, and you should have a good grasp on basic music theory. You may have heard the term 'chord progression' before. The chord progression is a string of chords that flows from one chord to the next. It is a great technique for creating songs as a guitar player. A guitar teacher or a music book will give you many examples of chord progression, but a great idea would be to create your own chord progression using one of the chords that you are most comfortable playing. This
